Section: D.4.6.2

Specific Transit Agency applicable to: Chassis GVWR

Question/Clarification or Approved Equal:

Chevrolet has ceased production on the 26,000 GVWR. The largest GVWR available is from Chevrolet is 22,000 GVWR. This GVWR is more than sufficient for all the Type IV buses. The required GVWR for the floor plans in this bid is 19,500. The 22,000 GVWR is more than sufficient to meet the requirement. No other chassis is available for the Type IV specification. Weight analysis will be provided to demonstrate that the 22,000 GVWR chassis will not exceed the bus requirement.

Coordinated Bid Response

The Clarification listed directly under D.4.6.2 calls for buses under 30 ft to have a 22,000 GVWR and those over 30' to have a 23,500 GVWR—TVT understand that Chevrolet cannot provide the heavier GVWR; it appears that the GVWR that can be provided would be acceptable and so this is approved.

For example, we were shorted on our allocation of 2009 and 2010 chassis by all three (3) manufacturers this past year. Chevrolet just announced the deadline of 06-18-2010 for ordering the G-series chassis. Chassis production and availability is beyond the control of the final stage manufacturer.
